Avant-Garde Art Movements

Initiatives in Architecture

- determined by finding most common types of information
- used to discriminate pieces of information
- groups data
- connects artists

# Starting point: picture

László Moholy-Nagy

## The Bauhaus School

László Moholy-Nagy was appointed a master of the metal workshop at the Bauhaus by its first director Walter Gropius, who shared with Moholy-Nagy an enthusiasm for experimental designs aimed for industry.

## The Bauhaus School

Gunta Stölzl joined the Bauhaus as early as 1919 and was studying in the weaving workshop. After she graduated, Stölzl was responsible for the technical direction of the workshop and then became its master. She was a very original weaver, but at the same time she was actively working on the development of industrial fabrics.

László Moholy-Nagy

## The Bauhaus School

Gunta Stölzl

# Goals

- use artists as starting points
- show complex data in a simple, visual way
- still give access to more complete data on demand

# Three questions

Who were the  
artists?

The Bauhaus School

How were they  
related?

## The Bauhaus School

László Moholy-Nagy was appointed a master of the metal workshop at the Bauhaus by its first director Walter Gropius, who shared with Moholy-Nagy an enthusiasm for experimental designs aimed for industry.

What were their  
experiences?

# II - Implementation
